GENERAL INFO

GENERAL BELGIUM CAMPUS INFORMATION

Mission

Our 'Official' mission statement:
To supply the industry with highly qualified and experienced Information Technology personnel through the provision of high quality, practice-orientated education and training of an international standard on a variety of aspects. This will contribute towards economic growth and the creation of wealth.

Put differently in less formal terms, it comes down to the following:
We offer our students the best business-orientated IT education possible; when they graduate, they can immediately add value to any company that employs them. To enable us to offer our students a superior education, we need to partner with as many businesses as possible to ensure we tailor our curriculum to their needs and obtain their financial assistance to give as many students as possible access to Belgium Campus. In return, we'll supply them with employees who have the skills to make any business and the economy thrive.

Vision

To transform South Africa into a prosperous region there is a great need for highly skilled graduates who have the right competences, and higher education has a great role to play in this development process. Belgium Campus realises that it has to do things differently from the traditional model that Universities operate in. The strategy of a University has a significant impact on regional development through cooperation with industry and business, by educating and delivering the necessary workforce on all different levels. Belgium Campus is at the forefront of what a modern University should be, by investing in people, attracting investors, running community programmes and engaging with the local community and authorities.
Belgium Campus conducts its operations in the Spirit of Ubuntu – for the benefit of all.

Vision on Quality Assurance

Belgium Campus's vision is to become a trademark that is associated with quality; quality in our educational offerings, day to day operations, and in applied research. To attain this, quality must come from within through strategic management and be implemented by the people who believe in this common vision. This vision is shared by academia, students, the industry, and local policy making authorities. With education in transition, Belgium Campus's dedication to quality and the pursuit of excellence in everything we do, will ensure that we stay at the forefront, equipping our students with top of the line academic qualifications and practical knowledge. In turn the industry will gain employees of the highest calibre.

Christian Values

Our Christian vision on humanity and society ensures an open climate and promotes cooperation between different cultures, races and religions. We place special emphasis on the importance of human dignity and the protection of the weaker. In this way we develop an intellectual atmosphere that is at the same time conducive to spiritual development. This is essential to prevent the evolution of science and technology creating a humanity gap.
