BACHELOR IN COMPUTING (BCOMP)

NQF Level 8 | 506 Credits

SPECIALISATIONS: Data Science
Software Engineering

OVERVIEW

A future-focused degree designed for students who want to lead innovation in advanced computing fields. The programme blends rigorous theory with intensive practical application, preparing graduates for high-demand roles in emerging technologies.

GRADUATE OUTCOMES

- Design and deliver advanced computing solutions.
- Apply data science or software engineering expertise.
- Solve complex technical challenges.
- Contribute to innovation using emerging technologies.

CAREER PATHWAYS

Data Science Stream:

- Data Analyst
- Data Scientist
- Machine Learning Engineer
- Data Engineer
- Business Intelligence Analyst

Software Engineering Stream:

- Software Engineer
- Solutions Architect
- Full-Stack Developer
- DevOps Engineer
- Technical Lead
